

DATA ODYSSEY

“This database is designed for an e-commerce platform that connects sellers and customers through an online marketplace. It contains essential datasets related to orders, products, customers, and ordered items..”

Problem 5. “What Did I Order Again?”

James placed an order but forgot what he purchased! He only remembers the **order ID: 12** . He needs a detailed breakdown of his order, including **product names, quantities, and the total price per product**. Write an SQL query to refresh James’s memory.

Problem:

Write an SQL query to refresh James's memory.

name	quantity	total_price
Jeans	3	119.97
Gaming Chair	1	199.99
