

DATA ODYSSEY

"This database is designed for an e-commerce platform that connects sellers and customers through an online marketplace. It contains essential datasets related to orders, products, customers, and ordered items.."

SQL High Roller Hunt 🏆

The marketplace is rolling out a **VIP reward** for its **biggest spender**—the customer who has spent the most money on orders. But who is it?

Your task: Write a query to find **the top spender** and the **total amount they've spent**.

```
+-----+-----+-----+
| customer_id | name       | total_money_spent |
+-----+-----+-----+
|           2 | Jane Smith |          1654.74 |
+-----+-----+-----+
```
