

# DATA ODYSSEY

*“This database is designed for an e-commerce platform that connects sellers and customers through an online marketplace. It contains essential datasets related to orders, products, customers, and ordered items..”*

## Problem 9. The Wrong Price Scandal! ⚠️

Customers are reporting that their order totals don't add up correctly. Upon investigation, you realize that the **total\_amount** in the order table has been incorrectly inserted. Use the **ordered\_items** table to recalculate and **display** the correct order totals (no need to update).

### Problem:

Can you fix this mistake before customers lose trust?

order_id	name	correct_amount
1	John Doe	2421.97
2	Jane Smith	1678.94
3	Alice Johnson	399.96
4	Bob Brown	149.95
5	Charlie Davis	79.98
6	David Miller	2299.93
7	Emma Wilson	1240.97
8	Frank Harris	59.97
9	Grace Lee	1449.44
10	Henry Adams	59.98
