

# DATA ODYSSEY

*“This database is designed for an e-commerce platform that connects sellers and customers through an online marketplace. It contains essential datasets related to orders, products, customers, and ordered items..”*

## SQL Ghost Hunt 🧛

Some products have been sitting on the marketplace **forever**, yet **no one has ever ordered them**. Are they cursed? Forgotten? Or just waiting for their time to shine?

Your task: Write a query to find all **“ghost products”**—products that have **never been ordered**.

Time to bring these forgotten items back to life! 🧑‍🔬📦✨
