

DATA ODYSSEY

“This database is designed for an e-commerce platform that connects sellers and customers through an online marketplace. It contains essential datasets related to orders, products, customers, and ordered items..”

SQL Order Recall Challenge:

James placed an order but completely **forgot what he purchased**—all he remembers is **Order ID: 12**.

Your task: Write a query to retrieve a **detailed breakdown** of his order, including **product names, quantities, and the total price per product**.

Can you help James **remember his order** before it arrives? 📝🔍📦

+-----+-----+-----+		
name	quantity	total_price
+-----+-----+-----+		
Jeans	3	119.97
Gaming Chair	1	199.99
+-----+-----+-----+
