

# DATA ODYSSEY

*“This database is designed for an e-commerce platform that connects sellers and customers through an online marketplace. It contains essential datasets related to orders, products, customers, and ordered items..”*

## Problem 4. The Best-Seller Challenge 🏆

The marketplace is running a competition to reward the **top 5** best-selling products. Your job is to identify these products based on the total quantity sold and provide the product names.

**Problem:**

Help determine the best products by writing an SQL query.

+-----+	
name	total_quantity
+-----+	
T-shirt	15
Pants	14
Pull overs	14
Jeans	14
Gaming Chair	14
+-----+
