# DATA ODYSSEY

"This database is designed for an e-commerce platform that connects sellers and customers through an online marketplace. It contains essential datasets related to orders, products, customers,and ordered items.."

Problem 8. The Ghost Products 👻

Some products have been listed forever, but strangely, **no one has ever ordered them**! The marketing team wants to run a promotion on these "ghost products."

Problem:
Write an SQL query to identify all products that have never been ordered.

product_id	seller_id	name	description	price	stock_quantity
11	6	Lighting Keyboard	The best keyboard in town	199.99	22
12	2	Shoes	Air forces	299.99	18
