# DATA ODYSSEY

"This database is designed for an e-commerce platform that connects sellers and customers through an online marketplace. It contains essential datasets related to orders, products, customers, and ordered items.."

SQL Inventory Mystery:

Taha, the owner of **Gaming World**, is convinced he added new products last week—but now, some have **vanished**. Is it a mistake, a glitch, or something more?

Your task: Retrieve a list of **all products** Taha is selling, along with their **stock quantity**. Can you solve the case of the **disappearing products?** 🕵️‍♀️🎮📦

```
+------------+-----------+----------------+------------------------+--------+----------------+
| product_id | seller_id | name           | description            | price  | stock_quantity |
+------------+-----------+----------------+------------------------+--------+----------------+
|          9 |         5 | Gaming Console | Next-gen gaming console | 499.99 |              8 |
